R.G. Ross Construction Company, Inc.

Fresenius Medical Care, St. Charles, MO

Project Profile: Medical

Owner: Fresenius Medical Care North America

Architect: FMC/RECS-Atlanta

Description: This 22 chair facility was in definite need of an upgrade. We replaced some flooring with new sheet vinyl. The treatment floor had recently been replaced. We replaced all the casework with new along with solid surface tops. The treatment floor received all new casework as well. This facility received all new paint, ceramic tile and wall covering. The patient restrooms were also renovated with new fixtures, flooring and wall tile. This facility is a nocturnal clinic and since we could only work in the patient areas while patients were not receiving treatment, it left only 3 nights a week to get this work accomplished.
