

## Lemay Early Childhood Center

Project Profile: Institutional

**Owner:** Lemay Early Childhood and Family Center

**Architect:** Cohen Collab

**Description:** A multi-source funded daycare addition and renovation. The project was constructed without any lost class days and little disruption to the ongoing operation of the facility. RGR worked with the project team during prelim design, budgeting, fundraising, final planning and construction. This small project was undertaken because of its location in the community where our office is located and we were so impressed with the commitment of their board, staff and supporters to providing affordable quality daycare for those who have financial restraints.
