

## Phyllis Wheatley YWCA Branch

Project Profile: Multi-tenant

**Owner:** YWCA Metro St. Louis

**Architect:** The Lawrence Group

**Description:** This project consisted of the rehab of an existing building built in the 1920's. Due to the historical significance of this building to the community, there were many items that had to be duplicated. Some examples of this would be the wood trim details as well as balustrades at the parapets. The end use of this great old building consists of thirty-three one and two bedroom residential units with hardwood floors.
