

Southside Assembly of God

Project Profile: Churches

Owner: Southside Assembly of God

Architect: Southside Assembly of God

Description: This 25,000 square foot worship/education facility was a complicated project. R.G. Ross was involved in the project after another contractor had left the project uncompleted. R.G. Ross Construction was able to sit down with both the owners and selected sub-contractors to assure everyone involved had a complete understanding of the revised scope of work to get this client into their new facility.
