

Monroe County Surgical Center

Project Profile: Medical

Owner: Medical Development Corporation of America.

Architect: OWH.

Description: This surgical center is located in Waterloo, IL. This 6800 square foot building was done as a design build project. This allowed the owner to have a one stop shop. The difficulty with this project was the state established budget. We were limited in both size and cost per square foot by state requirements. We were able to incorporate some higher finishes to provide the patients and visitors with added comfort. R. G. Ross was able to bring this project within budget and on time for the owner.
