

Great Southern Bank Omaha NE

Project Profile: Institutional

Owner: Great Southern Bank, Omaha

Architect: Tri Architects

Description: This project consists of an approximate 6100 square foot bank. The bank construction consists of mostly residential style of construction. It is wood framed with a brick veneer. This repeat client asked us to go out of state to build their flagship branch in Omaha NE. RG Ross stepped up to the plate. Not only did we give the Great Southern Bank a beautiful new facility, we also gave them money back at the end.
