

Fresenius Medical Care, Lincoln County, MO

Project Profile: Medical

Owner: Fresenius Medical Care North America

Architect: FMC/RECS-Atlanta

Description: This facility is a 16 chair 4 days a week clinic. The treatment area flooring had recently been replaced and was in good shape but the hallway along with the breakroom was in need of new flooring. The reception area shown above received all new casework along with the treatment area and breakroom. Both the patient restrooms and staff restrooms received all new fixtures along with paint, flooring and some ceramic tile. The waiting area was very dated and received new wall tile along with wallcovering and chair rail.
