

## Great Southern Bank Des Peres

---

Project Profile: Institutional

**Owner:** Great Southern Bank

**Architect:** Tri Architects

**Description:** This is an approximate 3,000 square foot bank building. The site was difficult to work with being an old gas station location. The project was actually held up for 3 weeks when an old underground oil storage tank was discovered. After remediation of the affected area, the project went very smoothly. The owner was completely satisfied with the end result.
