

## Wildwood Home

Project Profile: Custom Homes

**Architect:** Mitchell Wall Architects

**Description:** This 11,000 square foot ultra modern home features level 5 finishes, aluminum glazing and door systems, full home automation, home theater, solar energy power system as well as a propane back-up generator.

L.E.D. lighting, sleek modern cabinetry and a floating steel and glass staircase make this home like none other in St. Louis.

Situated on a beautiful lake, with custom detailed concrete pool and lazy river, it is nothing short of amazing.
