

Fresenius Medical Care, Breese, IL

Project Profile: Medical

Owner: Fresenius Medical Care North America

Architect: FMC/RECS-Atlanta

Description: This facility is the smallest that we have done. It has only 8 chairs. All the lighting on the treatment room floor were replaced with new LED fixtures. Also replaced, were the air diffusers to “Soft Air” for added patient comfort while going through treatment. The treatment room flooring was replaced with all new sheet vinyl. All casework in the treatment room was replaced with woodgrain laminate cabinets. The walls were painted to give it a fresh look. The reception area along with the breakroom received all new flooring, paint and casework. The waiting area received new wall covering, ceramic accent tile along with chair rail. All restrooms received new fixtures and finishes.
